

# Technical Safety Services Confined Space Safety Teams

Health and Safety Sciences, LLC (HSS) provides world class confined space rescue teams to industrial, municipal, and governmental organizations worldwide. Our mobile rescue teams are available for deployment to any location we are needed. Team members hold industry recognized certifications and TWIC credentials. All team members are part of an organized drug testing and medical evaluation program.

HSS is registered with ISNetworld, PEC Premier, and is an approved vendor for some of the largest companies in the United States. We maintain a 5 million dollar insurance policy and workers compensation coverage.

Teams can be tailored in 2, 3, 4 and 5 rescuer configurations. We do not charge for standard rescue equipment packages. Mobilization/demobilization and team hotel rooms while deployed are billed at cost to maintain your project budget.

Our team leaders assess every space and produce a written rescue preplan for each. This establishes a safe and effective plan of operations and utilizes the Incident Management System.

Health and Safety Sciences' Safety Services  
are rapidly deployable day or night.
