

Special Operations & Safety Technician Credential

S.O.R.T.

Health and Safety Sciences, LLC's Talon Group Division has a reputation as the best of the best when it comes to emergency response teams and team training. Being recognized by the training cadre of Talon Group is one of the highest compliments that can be paid to an emergency response team or team member. Talon Group is proud to offer emergency response teams the

opportunity to be recognized among the top of the industrial emergency response profession through our Special Operations Rescue Technician (**S.O.R.T.**) program. We recognize two different types of industrial emergency response technicians through our **S.O.R.T.** credentialing program – General Industry and Marine Industry.

Upon completion of the industry designated specific course requirements, students are issued a certificate of achievement, a **S.O.R.T.** shoulder tab and a Talon Group Emergency Response Team shoulder patch which they can proudly display on their uniform to demonstrate their proficiency as a professional industrial emergency responder.

No Excuses, Be The Best!
